## Link Popularity

Link popularity is the total number of web pages that link to your site. However, the "popularity" is only part of the link analysis. All major search engines also take the quality and the context of the links into account. The idea behind evaluating the link popularity is that your web page must offer good content when many quality sites link to it.

### Do the following to improve the ranking for your web site on Google.com for the search term "Jupiter Florida"

- OK You have at least as many web pages linking to your web page as the top ranking web pages. This basically meets the requirements. However, Google.com also evaluates the quality of the web pages that link to your web site.
- OK Open Directory Project (dmoz.org) links to your web page "http://www.jupiterdaily.com/". This is good as it could be important for a top ranking on Google.com for the search term "Jupiter Florida".
- OK It seems that a link from Yahoo.com directory is not important for a top ranking on Google.com for the search term "Jupiter Florida".

### Link Popularity Analysis

	Your Site	#1	#2	#3	#4	#5	#6	#7	#8	#9	#10	Range
Number of Inbound Links	270	152	1,460	351	957	256	297	260	135	326	377	135 to 1,460
Linked from Dmoz.org	yes	yes	yes	yes	yes	yes	yes	yes	no	yes	yes	9 linked, 1 not linked
Linked from the Yahoo.com directory	no	no	no	no	no	no	no	no	no	no	no	none linked

## URL

The URL is the address of a web page, for example "www.domain.com/index.htm". This chapter tries to find out if Google.com gives extra relevance to search terms within the URL. When you create web pages with search terms in the URL, separate them with dashes.

Example: <http://www.your-keyword.com/your-keyword/your-keyword.htm>

## Same Site Link Texts

Link texts are words and sentences that are used as links. Same site link texts are the link texts of the links that point to a web page on the same domain. This chapter examines if Google.com takes search terms in same site link texts into account.

Example: The HTML tag `<a href="contact.htm">Contact information</a>` contains the same site link text "Contact information".

## Outbound Link Texts

Link texts are words and sentences that are used as links. Outbound link texts are the texts within the <a>...</a> tags when the <a> tag links to a web page on a different domain. This chapter examines if Google.com gives relevance to search terms in outbound link texts.

Example: The HTML tag <a href="http://www.not-your-site.com/about.htm">About the company</a> contains the outbound link text "About the company".

## Inbound Links

"Inbound links" are links on other web pages that point to your web page. Many search engines take the wording and the exact address of the inbound links into account when determining the ranking of your web site.

### Do the following to improve the ranking for your web site on Google.com for the search term "Jupiter Florida"

General advice about inbound links: Many search engines think that your web page must be relevant for the search term "Jupiter Florida" if other web pages link to your page with "Jupiter Florida" in the link text.

If many web pages link to your page with the link text "Jupiter Florida", then it's more likely that your web page will obtain a good ranking for the search term "Jupiter Florida".

How inbound links to your site should look like: When you exchange links with other web sites, make sure that your important keywords are in the link texts.

For example, if 20 other web sites link to your page with the HTML source '`Click here for <a href="http://www.jupiterdaily.com/">Jupiter Florida</a>`', then it's much more likely that you'll obtain a good ranking for the search term "Jupiter Florida" than if 100 web sites link to your page with '`<a href="http://www.jupiterdaily.com/">Click here for more information</a>`.'

## Same Site Link URLs

Links connect one web page to another. Same site links are the links in <a href> attributes that point to other pages on the same domain. This chapter examines if search terms in same site link URLs are relevant to Google.com.

Example: The HTML tag <a href="contact.htm">Contact information</a> contains the same site link URL "contact.htm".

## Outbound Link URLs

Links connect one web page to another. Outbound links are the links on a web page that point to web pages on other web sites, i.e. links to other domains. This chapter examines if Google.com gives relevance to search terms in outbound links

Example: The HTML tag `<a href="http://www.not-your-site.com/info.htm">Click here</a>` contains the outbound link URL "www.not-your-site.com/info.htm".

## IMG ALT Attributes

The <img alt> attribute defines an alternative text for an image when the user uses a text browser or when the user has turned off the display of images in the web browser application. Microsoft's Internet Explorer displays the alternative text if the user puts the cursor over the graphic. This chapter tries to find out if it makes sense to include the search term in the <img alt> attributes to improve your rankings.

## General Advice

This chapter examines the general search engine compatibility of your web page.

### Do the following to improve the ranking for your web site on Google.com for the search term "Jupiter Florida"

- OK Search engines need text to index your web pages, to determine the theme of your web site and to produce a site summary. They cannot read what is written on your graphical images or in a Flash movie. Google recommends to create a useful, information-rich site. Fresh, continuously updated content is one of the best ways to ensure that search engines return to your web site (and your visitors, too). Your web page "http://www.jupiterdaily.com/" contains 494 words which should be enough for the search engines.
- >> Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. >>	Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. The search term "travel" of your Meta Keywords tag doesn't seem to be mentioned in the body text of your web page. You should either remove this search term from your Meta Keywords tag, or add the search term to the body text of your web page.
>>	Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. The search term "web design" of your Meta Keywords tag doesn't seem to be mentioned in the body text of your web page. You should either remove this search term from your Meta Keywords tag, or add the search term to the body text of your web page.
>>	Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. The search term "hotels" of your Meta Keywords tag doesn't seem to be mentioned in the body text of your web page. You should either remove this search term from your Meta Keywords tag, or add the search term to the body text of your web page.
OK	Your web page doesn't use the Meta Refresh tag so there won't be any problems with the search engines in this aspect.
OK	Your web page doesn't use the Meta Robots tag so there won't be any problems with the search engines in this aspect.
>>	Your web page uses the Meta Title tag. Some search engines could think that you try to stuff keywords on your web page. They could decide not to index your web page. Consider removing this tag.
OK	Your web page doesn't use any Dublin Core meta tags so there won't be any problems with the search engines in this aspect.
OK	Your web page doesn't use any Meta tags twice so there won't be any problems with the search engines in this aspect.
OK	Your web page doesn't use the <title> tag twice so there won't be any problems with search engines in this aspect.
OK	Some search engines and directories don't accept submissions with capitalized letters in the document title or in the meta tags. Your web page doesn't use all capitalized letters in those web page elements so there won't be any problems with the search engines in this aspect.
OK	Your web page uses script code in an external file so you've already minimized the problems with scripts and the search engines.
>>	Your web page uses 2,224 bytes of style sheet code which makes it harder for search engines to index your page. Consider putting the style sheet code in an external file with the <link rel="stylesheet" href="mystyles.css" type="text/css"> command. The file "mystyles.css" should be a simple text file that contains only the style sheet code without any HTML markup. The next time your page is spidered by the search engine robots, the important content on your page will be closer to the top of the page, and you might have a better keyword density.
OK	Your web page doesn't use frames so there won't be any problems with the search engines in this aspect.
>>	Some search engines consider tiny text (i.e. font size 1) as an attempt to fool the search engines. Some webmasters have abused tiny text in the past to hide dozens of keywords on a web page that human web surfers cannot see. Your web page seems to use 155 letters in a very small font size ("Please Visit our Sponsor: Please Visit our Sponsor: Copyright © 2001-2006, JupiterDaily.com - Your..."). Consider removing as much of the tiny text as possible to prevent penalizing from some search engines.
OK	Your web page URL "http://www.jupiterdaily.com/" doesn't indicate a dynamically served web page so there shouldn't be any problems with the search engines in this aspect.
OK	Your web page URL "http://www.jupiterdaily.com/" doesn't contain any of the special characters "&", "\$", "%", "?" or "=" in it so there shouldn't be any problems with the search engines in this aspect.

OK Some search engines and directories rank web sites lower that are hosted at free web space providers, or if web sites don't have their own domain name. Some search engines also limit the number of web pages they'll index from a single domain. Your web site doesn't seem to be hosted at a free web space provider. If it does, consider getting your own domain name.
